Their perseverance, however, paid off, just as the 2012 pinball finally turned the corner again with the release of AC/DC - one of the biggest names in rock music. Sold in huge numbers throughout the Giving pinball a much needed shot in the shoulder. AC/DC was the 21st century's 21st century. It was also the first pinball to be released at three price points (pre, premium and limited edition) and appealed immensely to the growing collectors market. Now fast forward to 2020. As some people search for physical, non screen-based entertainment activities, pinball is on the rise again. Combining market trends and the craft beer movement meant that Pinball again found its foothold as a great social activity. Over the past few years, the emergence of new manufacturers such as Jersey Jack and Creepy Pinball would confirm this theory. For me, a lot of pinball and arcade games have come and gone through my possession. At one point around 2008 I largely left the industry and sold most of my collection at relatively low prices. The market was so flat, it's ebbet and flowed. Some titles I even bought back 3 times, sometimes the very same machines. Through it all, I had a lot of fun and met a lot of great people in the hobby. Some of these people you'll hear from my podcast interviews on this page. I was looking forward to being a player, collector, operator, repairman and restorer, and now since 2014, a competitor. IFPA's social tournament circuit is buoyancy, both in NZ and internationally. If you want to know more about it and get involved, check out IFPA Pinball in NZ and internationally. So here we have Pinball Spots, my Wellington, New Zealand-based shop window on all things pinball – podcasts, stories and great places to play my games. Please log in as often as you want. If you have any comments or stories of your own, I'd love to hear from you. Happy flipping! Cheers, cheers.
